

Bryan Donkin Valves Limited is part of the AVK Group; market leaders in the supply of valves, fittings and flow control equipment to the Water, Waste Water, Oil and Gas industries throughout the world.

We understand that our people are our best asset and we are committed to building a team of successful, energetic yet conscientious people, who are passionate about driving our company forward. That's why we are on the lookout for an ambitious Operations Manager, whose focus is on the effective management of people, material and equipment to achieve a first class level of customer service

Are you a experienced Operations Manager looking for your next career move? Are you able to build strong customer relationships and drive a large operational team to success? Are you a proven leader who will provide clear direction for your team, defining operational strategy and setting clear but measurable operational goals to support the company strategy and achievements.

We are looking for an Operations Manager who can deliver a World class level of operational and customer service excellence both within your own site team and cross functionally through effective continuous improvement, process management and establishment and maintenance of inspirational leadership.

### **Brief Overview:**

The main purpose of the role is to lead all manufacturing processes to the highest standards and within pre-defined deadlines. The effective management of people, material and equipment to achieve a first class level of customer service. To develop and manage the execution of plans to support overall site's and business objectives through the deployment of 'lean sigma' methodologies and metrics working towards achieving a culture of continuous improvement. To drive change and continuous improvement in all aspects of manufacturing, value engineering, planning and resource utilisation.

### **The primary tasks include, but are not limited to:-**

- To have full site responsibility, including all manufacturing, office, within the perimeter of AVKD.
- To be SHEQ Compliance.
- The effective management of people, material and equipment to achieve a first class level of customer service
- To maintain a preventive maintenance computerised system and evaluate asset management. To make recommendation of capex replacement.
- To manage all on site employees with people related matters. Including recruitment, labour planning, employee relations and performance management opportunities.
