

AVK UK AT NO DIG 2018

Following on from the successful launch of the AVK Pentoflow range of boundary boxes, service fittings and tapping saddles at the 'No Dig' event in 2016, AVK UK returned to exhibit again at the 2018 show in September and were overwhelmed with the positive response.

Since 2016 the AVK Pentoflow range has expanded and now includes three new AVK Pentobox models, which were all on display during the show. The latest water meter boundary boxes attracted a great deal of interest, resulting in approximately 100+ visitors to the stand throughout the three days. Visitors were particularly impressed to learn that the class leading boundary box range now has a number of improved solutions for Grade B and C installations in addition to AMR, the show also offered an exclusive opportunity to preview, the forthcoming AVK Double Pentobox.

The AVK Pentomech, Pentopush, Pentovalve and Pentotap also received very positive feedback, resulting in a number of enquiries for

field trials. The installation companies visiting the stand, that are already familiar with the range, confirmed that it was designed under the AVK promise – Expect solutions and not only products.

AVK chose NO-DIG LIVE as it is a live, dynamic show where manufacturers and suppliers can display and demonstrate products at an event which is truly focused on trenchless technology, and practical pipeline techniques. Attracting a unique cross section of visitors from site operatives to utility policy makers.

The AVK Pentoflow range was also supplemented on the stand by the Series 01/79 RSGV with SupaPlus socket connections and two products from the SupaMaxi range, a straight coupler and transition coupler. The fittings created a great deal of interest and with positive feedback from many customers who have previously used the Series 01/79 commenting on the quick and easy installation of the valve.”

If you would like to know more about any of the products mentioned above, please contact:

Expect... **AVR**

EXPECT... LASTING INNOVATIONS

AVK PENTOFLOW WATER MAINS TO METER

**A BETTER BUILT PRODUCT
MEANS A BETTER JOB DONE**

AVK PENTOBX

- Grade B: 8 tonne rated as standard – suitable for driveways. Grade C: 1.5 tonne rating available – suitable for footpaths.
- Easily adjustable 7° angle of tilt and telescopic height adjustment.
- One piece manifold, reducing potential leak paths with a ¼ turn ball valve.
- Push fit joint, no special tool required to demount nut – quick, easy install.
- Class 1 sealed.

AVK PENTOMECH

- Innovative seal – ensures a water tight solution.
- Seal design – improves connections to undersize pipe, pipe showing wear and ovality.
- Seal design – reduces effort to insert pipe in sizes > d50mm.
- Dedicated fittings means dedicated seals, no long term joint stresses.
- All fittings are rated PN16 including stop taps.

AVK PENTOPUSH

- Push-fit solution where space is tight, no tightening required.
- Slim-line design minimises excavation and space above ground.
- High tech composite materials used gives it a class leading strength, especially with threaded connections.
- Universal range - complete coverage in pipe sizes from 15-63mm OD.
- Innovative Push-fit design minimises effort to insert pipe.

AVK PENTOTAP

- AVK PENTOTAP ferrules and self tapping saddles are available ex-stock.
- Live connections on to PE, PVC and AC pipe without specialist equipment.
- AVK PENTOTAP fittings are available up to a pressure rating of PN16.
- 360° rotational banjo outlets with full flexibility of connection.
- Saddles are available up 32" PVCU, d1000mm PE, 28" AC, d800mm Steel and d842mm K9 ductile.

AVK PENTVALVE

- AVK PENTVALVE plastic Stop taps are available ex-stock.
- Size range d20-32mm.
- AVK PENTOMECH joints – Innovative seal design.
- AVK PENTVALVE Stop taps are PN16.
- Robust operating crutch built to last.
- Proven reliable valve design for above and below ground use.
